

PRODUCT DATA SHEET

URINAL BLOCK

SOLID FORM (30 to 40 days)

DESCRIPTION:

Urinal Blocks are uniquely formulated, fragranced bacterial tablets which are used in urinals for a slow dissolving bio-enzymatic bowl cleaner, septic treatment and drain line treatment. The bacterial strains present in Urinal blocks degrade uric acid, which is the leading cause of odours and drain line blockages in a urinal system.

CHARACTERISTICS:

Bacteria Type:	Bacillus Uric acid digesting bacteria enzyme blend
Bacteria Count:	4 billion cfu's/mg
Form:	Solid
Appearance:	Blue Colored Tablets
Fragrance:	Fresh Scent
Shelf Life:	5 Years/U.O.C
Effective pH range:	6-11
Effective Temperature Range:	7-65.5°C

APPLICATIONS:

Urinals

BENEFITS:

Odour removal
Eliminates uric acid buildup
Urinal drain line maintenance

DIRECTION FOR USE:

Urinal Blocks can be deposited directly into the urinals or placed in plastic rim cages.

PRODUCT LIFE:

Heavy usage: 25-30 days
Medium usage: 30-40 days
Light usage: 40-60 days
